To Whom it May Concern:

Team Build LLC (dba FS Group) is performing engineering and architecture services on the Northeast Water Purification Plant Expansion Project for Jacobs Engineering Group (as Houston Waterworks Team Joint Venture). This \$1.78 B design build project includes nine buildings and a state of the art administration building.

The FS Group has performed well and effectively collaborated with our project management team, and project owners on each assignment. We would be happy to work with them again on other on-call assignments.

Regards,

Jacobs Engineering Group, Inc.
