To: Whom it May Concern

Together, Team Build LLC (dba FS Group) and Isani Consultants are performing engineering and architecture services on an as-needed basis for the \$1.4B Northeast Water Purification Plant Expansion.

The overall plant development is in four phases, and the team is providing as-needed services on the civil, structural, mechanical, and architecture phases of the project. Design assignments were initiated in 2016 and new scopes of work will be added for each added assignment until construction ends in 2025. Work scopes assigned to the above team to date include: civil works design, road design, SWPPP, architectural renderings, architectural plans for 9 buildings including a state of the art administration building, and BIM for all facilities.

The project team has worked very well together and has effectively collaborated with our project management team and project owners on each design assignment. We would gladly work with the team again on other on-call assignments.

Please feel free to contact me at 832-395-2326 or at ravi.kaleyatodi@houstontx.gov if you have any questions.

Sincerely,

Ravi Kaleyatodi
